

MODEL 7100M MINIATURE AUTOMATIC VIDEO TRACKER EDGE/CENTROID/CORRELATION

The Model 7100M Miniature Automatic Video Tracker (AVT) belongs to the latest tracker product family in E-O Imaging's continued commitment to product innovation and improvement. This board is designed to allow complete interface customization to our customer's required applications. It is available in either a High Definition (HD) configuration or a Camera Link (CL) version and provides the user a system easily adapted to a wide range of target and tracking environments. This is accomplished through the incorporation of the latest in digital signal processing (DSP) and field programmable gate array (FPGA) technology (providing a flexible architecture for customization). The Model 7100M can be interfaced with both analog and digital video sources, application dependent, providing ease in interfacing with a wide variety of sensor systems. The analog video interface provides full 12-bit, 4096 gray level capability supporting an array size up to 1024 x 1024. The HD video interface supports 480i, 480p, 720p, 1080i and 1080p resolutions, SMPTE 259M / SMPTE 344M / SMPTE 292M, while the Camera Link digital video interface supports array sizes up to 2048 x 2048 with 16-bit resolution. The tracker design allows concurrent operation of algorithms in realtime. The system is structured with an open architecture allowing easy incorporation of specialized features and algorithms. The Model 7100's standard features and options permit easy adaptation to even the most complex and demanding test range, tactical, surveillance and industrial applications.

Standard Features

- Selectable Edge, Mass/Intensity Centroid, Vector* and Correlation Algorithms
- Multi-Target Detection
- Sophisticated Intrusion Detection and Recovery Algorithms
- Auto Acquisition and Target Detection
- Automatic/Manual/Gate Size and Position
- Adaptive and Manual Threshold Functions
- Robust Coast and Target Reacquisition Algorithms
- Advanced PID Servo Compensation Filter
- Embedded Motion Control Interface for Various Pedestals
- Embedded Smart Lens Controller Interface
- Embedded Laser Rangefinder Interface
- RS-232/422 Serial Ports customized to user requirements
- 10/100/1000 Ethernet Port
- Zoom Scaling/Correction
- Interlaced and Progressive Video Format Capability
- 2048 x 2048 Sensor Array Capability
- Pixel Clock Rates up to 206 MHz
- Frame Rates up to 250 Hz with 640 x 480 sensors
- Standalone Configuration (without PCI backplane)
- Integrated Target Simulator
- User Text Annotation and Graphics
- Multiple Frame and Overlay Buffers
- Video Interfaces (customized to user requirements)
 - Camera Link (Base, Medium, Full)
 - HD-SDI (480i, 480p, 720p, 1080i, 1080p)
 - LVDS
 - Analog (CCIR, PAL, NTSC, RS-170, RS-343A)

Typical Applications

- Weapon System Director
- Real Time Missile and Aircraft Tracking
- Surveillance
- Weapon System Evaluation
- Simulator Systems
- Trajectory Analysis
- Bomb and Weapons Scoring
- Image Matching
- Automated Calibration of Tracking Systems
- Laser System Alignment
- ECM Evaluation
- Spatial Measurement of Objects
- Re-entry Vehicle and Satellite Tracking
- Biomedical Analysis

Available Options

- High Definition or Camera Link Configuration
- Remote Control Unit (Models 702 and 704)
- Environmentally-Controlled Video Camera (Models 901 and 902)
- Nonstandard Video Formats
- Custom Packaging
- Custom Symbolology and Annotation
- Custom Algorithms
- Trajectory Simulation Capability
- Operator Training Capability
- Image Stabilization
- Image Processor
 - Target Enhancement/Detection
 - User-Definable Filter Characteristics
 - Stored Filters
- Multi-Target Tracking

* Vector Track mode is only available with mount position feedback.

MODEL 7100M

MINIATURE AUTOMATIC VIDEO TRACKER SPECIFICATIONS

Electrical Interface

- **Video Interfaces (customized to user requirements)**
 - Camera Link (Base, Medium, Full)
 - HD-SDI (480i, 480p, 720p, 1080i, 1080p)
 - LVDS
 - Analog (CCIR, PAL, NTSC, RS-170, RS-343A)
- **Analog Errors (2)**
 - Azimuth and Elevation Errors
- **Tracker Status Discrettes (3)**
 - **On-Target Discrete:** indicates that target data is present
 - **Coast Discrete:** indicates target has been lost and reacquisition sequence is in process
 - **Track/Acquire:** indicates track state
- **Digital Input/Output**
 - 16-bit bi-directional interface
- **Analog Input (customized to user requirements)**
 - Analog input ports +/- 10v max, 8 channels, 16-bit Resolution for Joystick, Zoom Position and Related Functions

System Control Interface

- **Serial Interfaces**
 - 115.2 K bit max. (default) - Software selectable RS-232/422
- **Gigabit Ethernet Interface**
 - Auto-negotiating 10/100/1000 Ethernet interface
- **Custom**

Functionality

- **Tracking Algorithms**
 - Mass Centroid
 - Intensity Centroid
 - Selectable Edge (top, bottom, left, right)
 - Correlation (Exhaustive Search)
 - Vector (Leading Edge) Track*
- **Tracking Gate Auto/Manual Size**
 - **Manual:** adjustable from 1% to 90% of the field-of-view area in Edge and Centroid Modes
 - **Adaptive:** automatically adjusts to variations in target size
 - **Correlation Mode:** Reference area size from 8 x 8 up to 64 x 64 elements, independent horizontal and vertical size controls. Search area is 128 x 128 pixels/line.
- **Threshold (automatic/manual)**
 - Allows identification of White and/or Black contrast targets or target gray levels
 - Automatic multi-gray level detection
- **Automatic Coast Mode**
 - Statistical Process determines the validity of the target
 - Optimal recovery from intrusions and disruption of track
- **Reticle**
 - Defines the AZ/EL null point of the system
 - User selectable reticle formats

- **Display Symbology (customized to user requirements)**
 - Tracking Gate Outline (Window/Corners)
 - Reticle (Crosshair)
 - Track Point Indicator (Flag/Crosshair)
 - Offset Track Point
 - Threshold Enhancements (Highlighted Target Data)
 - Characters for displaying system status and mode information
 - Alphanumeric generator for user-defined messages
- **Graphical User Interface**
 - PC-based program for configuration setup and testing through the RS-232/422 or Ethernet interface
- **Built-In-Test**
 - Performs end-to-end testing
 - Verifies all track modes
- **Field Downloadable Software Updates (DSP/FPGA)**
- **Sophisticated PID Filter**
- **Configuration Save Capability**
 - Stores up to 10 user-defined configurations in FLASH
 - Allows user to define Tracker boot-up configuration
- **Embedded Motion Control Processor**

Physical Specifications

- **Board Dimension**
 - Customized to user-defined Form Factor (approx. 18 in²)
 - Conformal Coated
- **Temperature Range**
 - Operating
 - -40° to +85°C
 - Storage
 - -45° to +85°C
- **Cooling**
 - Conduction Cooling per IEEE Standard 1101.2-1992
- **Relative Humidity**
 - 0 to 95% non-condensating
